EXPERIENCE

Senior Technical Writer

February 2023 to September 2026

LandingAI, Remote

- Owned all documentation strategy and execution as the organization's sole technical writer, producing overviews, task-based guides, API references, and SDK docs, and setting the editorial and information-architecture standards for the entire docs estate.
- Built an agentic documentation workflow that reviews core engineering repositories, identifies PRs affecting customer-facing docs, and drafts updates grounded in the style guide, criteria, and templates I authored, then opens PRs for human review.
- Using Claude, developed a Python script that transforms engineering's raw OpenAPI spec into a publishable API reference: it removes internal-only fields and adds curated examples, keeping the docs accurate as the spec changes.
- Led the migration from Document360 to a docs-as-code platform (Mintlify): built the business case, established requirements, evaluated vendors, executed the migration, and drove cross-functional adoption.
- Established the style guide and standards, encoded them in a CLAUDE.md that guides Claude when drafting, and enforced them with automated, Claude-assisted checks.
- Optimized documentation for AI consumption: auto-generated llms.txt files, maintained SKILL.md files, refined the docs AI assistant, and structured pages for reliable LLM retrieval.
- Wrote and tested sample code (Python, TypeScript, cURL) against live APIs, and built automated checks to prevent shipping broken code.
- Partnered with Product, Engineering, QA, Customer Success, and Marketing to frame customer needs, align on release scope, and drive cross-functional efforts that route both people and AI agents to our docs, skill files, and CLI.
- Defined and tracked content quality and discoverability using analytics (Google Analytics, Search Console) and reader feedback (search and AI-assistant queries, support tickets, forum posts) to drive continuous improvement.

Senior Technical Writer

July 2022 to January 2023

Amazon, Remote

- Documented storage and configuration management tools for an audience of internal software developers and project managers.
- Developed and implemented a plan to migrate content from an internal wiki to MadCap Flare.
- Conducted surveys to collect quantitative data and anecdotal feedback on documentation.

Senior Technical Writer

August 2019 to June 2022

Orange Logic, Remote

- Created hundreds of pages of documentation for complex cloud-based software, serving audiences that ranged from internal implementation specialists to external software administrators.
- Championed a project for developing an in-house authoring tool. Created detailed requirements and coordinated with developers, product managers, and the COO to make this tool a reality.
- Created procedures for managing digital assets in Microsoft Azure, Amazon S3, and AWS Snowball.

EXPERIENCE (CONTINUED)

Documentation Manager

March 2013 to August 2019

RED Digital Cinema, Irvine, CA

- Managed the creation and publication of all user guides and tech specs for professional cameras.
- Hired, managed, and trained a team of technical writers and documentation specialists.
- Led a large-scale information architecture and tooling overhaul: selected MadCap Flare and managed the migration of the full content library from Word and InDesign.
- Researched and selected a translation vendor. Managed translation into seven languages.
- Analyzed customer support tickets in Zendesk to identify documentation gaps and created knowledge base articles to address user pain points.

Technical Writer (Contract)

July 2011 to March 2013

Eyefinity, Irvine, CA

- Documented electronic health record (EHR) systems and practice management systems.

Technical Publications Intern

June 2010 to June 2011

Invensys Operations Management, Lake Forest, CA

- Wrote and edited user guides and technical advisory bulletins for safety control systems.

SKILLS

Authoring Tools and Concepts

Docs-as-code, OpenAPI, Mintlify, MadCap Flare, Document360, FrameMaker, Microsoft Office Suite, Google Docs, Confluence, Acrobat Pro

Software Development

Markdown, Python, JavaScript, TypeScript, cURL, HTML, CSS, GitHub, CI/CD, Cursor, Visual Studio Code, Terminal, Postman, Jupyter Notebook, Google Colab

AI and Agent Tooling

Claude Code, SKILL.md, AGENTS.md, MCP, CLI

Analytics, Support, and Project Management

Google Analytics, Google Search Console, Pylon, Zendesk, Discord, Circle, Pendo, JIRA, Asana

Image and Video Editing

Illustrator, Photoshop, GIMP, Sketch, Camtasia, LucidChart

EDUCATION

University of California, Irvine

Bachelor of Arts in English

Minors: Spanish and Management
